

ASIF KHAN M F

DATA ANALYST

+91 9645338031 | Asifkhanmf@gmail.com | LinkedIn Profile | Kochi, Kerala

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with a strong foundation in processing, analyzing, and visualizing complex datasets to drive informed business decisions. Proficient in executing end-to-end data workflows, including data wrangling with Python, database querying using SQL, and designing interactive dashboards in Power BI and Tableau. Adept at identifying underlying market trends and translating raw data into actionable insights. Eager to leverage technical expertise, analytical problem-solving skills, and a strong understanding of Generative AI concepts to contribute to data-driven organizational success.

PROFESSIONAL EXPERIENCE

Data Analyst Intern

Nov 2025 - Present

Camerinfoles Private Limited, Kochi

- Data Wrangling & Cleaning:** Process and sanitize raw, real-world datasets to ensure data accuracy and reliability using Excel and Python libraries (NumPy, Pandas).
- Database Querying & Analysis:** Leverage SQL to extract relevant data, define key business objectives, and uncover underlying trends.
- Data Visualization:** Design and develop interactive dashboards and visual stories using Power BI and Tableau to make complex data easily digestible.
- Reporting & Presentation:** Compile comprehensive analytical reports and present data-driven findings clearly to support informed decision-making.

RELEVANT PROJECTS

Job Market in India

Tools: Excel, Power BI | Focus: Reporting, Analysis

- Analyzed job market data to identify demand trends, translating raw datasets into clear, actionable reports to assist in strategic planning.
- Designed user-friendly dashboards to present comprehensive information, ensuring that insights were easily accessible and visually appealing for decision-makers.

Global EV Market Analysis

Tools: Excel | Focus: Record Management

- Organized and structured 3,000+ records using **Excel**, ensuring data consistency, accuracy, and clean documentation formatting.

SKILLS & COMPETENCIES

Technical Skills Programming: Python (Pandas, NumPy), SQL Visualization Tools: Power BI, Tableau Data Handling: Excel (Advanced), Data Cleaning, Wrangling	Operations & Coordination Analysis: Trend Identification, Database Querying Process: Requirements Validation, End-to-End Workflows Admin: Reporting, Record Management, Documentation
AI & Emerging Tech Core AI: Generative AI Concepts, LLM Fundamentals Frameworks: Prompt Engineering Tools: ChatGPT, Gemini (Drafting, Research & Analytics)	Soft Skills Work Style: Analytical Problem Solving, Attention to Detail Communication: Clear Presentation, Written/Verbal Skills

EDUCATION

B.Tech - Electronics and Communication Engineering

2024

Ponnaiyah Ramajayam Institute of Science and Technology, Thanjavur
